Bimini Capital Management Announces Fourth Quarter 2015 Results

VERO BEACH, Fla., March 21, 2016 (GLOBE NEWSWIRE) -- Bimini Capital Management, Inc. (OTCBB:BMNM), ("Bimini Capital", or the "Company") today announced results of operations for the three month period ended December 31, 2015.

Fourth Quarter 2015 Highlights

- | Bimini's REIT status terminated effective January 1, 2015
- | Net income of \$64.8 million, or \$5.20 per common share, including income tax benefit of \$63.4 million
- | Book value per share of \$5.54
- | Company to discuss results on Tuesday, March 22, 2016, at 10:00 AM ET

Tax Status

Certain trends and events experienced during 2015 have caused Bimini Capital to no longer meet the Internal Revenue Code's (the "Code") rules and regulations to be taxed as a REIT, effective January 1, 2015. In particular, additional offerings of common stock by Orchid Island Capital, Inc. ("Orchid") in 2015 increased revenue attributable to management fees received from Orchid. In addition, payments that have been and will be made by Bimini Capital pursuant to a litigation settlement agreement entered into in 2015 have reduced and may continue to reduce the value of Bimini Capital's assets and the amount of revenues generated by our mortgage-backed securities portfolio. Consequently, the value of our two Taxable REIT Subsidiaries has increased in relation to the value of Bimini Capital's assets to a level that exceeds the limits permitted for a REIT under the Code.

The failure to qualify as a REIT subjects Bimini Capital's taxable income to federal and state corporate income taxes at regular corporate rates. However, Bimini Capital and its subsidiaries have net operating loss ("NOL") carryforwards that we believe will be available to offset taxable income, if any, in 2015 and reduce taxable income in future periods. Management is implementing certain internal restructuring transactions that would maximize its ability to utilize the existing federal NOL carryforwards.

In addition, the termination of our REIT status eliminates the income, asset, distribution, and stock ownership requirements applicable to REITs under the Code, which will provide us with more flexibility in executing our business strategy. Specifically, because we are no longer required to derive a significant portion of our income from mortgage or other real estate related investments, we will have greater flexibility to invest in other types of assets within our existing universe of agency MBS securities as part of our principal investing activity, subject to maintaining compliance with our exclusion from regulation as an investment company under the Investment Company Act of 1940, as amended (the "Investment Company Act"). In addition, because we will no longer be subject to the REIT distribution requirement, we will have greater flexibility to retain our earnings to fund future growth.

Details of Fourth Quarter 2015 Results of Operations

The Company reported net income of \$64.8 million, for the three month period ended December 31, 2015. These results included an income tax benefit of \$63.4 million due primarily to the reversal of a valuation allowance on deferred tax assets. The results for the quarter also included net interest income of \$0.7 million, net portfolio losses of \$0.5 million (which includes realized and unrealized gains (losses) on securities sold and derivative instruments), gains on retained interests of \$0.2 million, advisory services revenue of \$2.0 million, unrealized gains and dividends on Orchid common stock of \$1.2 million and operating expenses of \$2.3 million.

Management of Orchid Island Capital, Inc.

Upon completion of its initial public offering, Orchid became externally managed and advised by Bimini and its MBS investment team pursuant to the terms of a management agreement. As Manager, Bimini is responsible for administering Orchid's business activities and day-to-day operations. Pursuant to the terms of the management agreement, Bimini Advisors provides Orchid with its management team, including its officers, along with appropriate support personnel. Bimini also maintains a common stock investment in Orchid which is accounted for under the fair value option, with changes in fair value recorded in the income statement for the current period. For the three months ended December 31, 2015, Bimini's statement of operations included a fair value adjustment of \$0.8 million and dividends of \$0.4 from its investment in Orchid common stock. Also during the three months ended December 31, 2015, Bimini recorded \$2.0 million in advisory services

revenue for managing Orchid's portfolio consisting of \$1.0 million of management fees, \$0.3 million in overhead reimbursement, and \$0.7 million in accrued compensation paid by Orchid to officers and employees of Bimini.

Capital Allocation and Return on Invested Capital

The Company allocates capital between two MBS sub-portfolios, the pass-through MBS portfolio ("PT MBS") and the structured MBS portfolio, consisting of interest only ("IO") and inverse interest-only ("IIO") securities. The table below details the changes to the respective sub-portfolios during the quarter.

The tables below present the allocation of capital between the respective portfolios at December 31, 2015 and September 30, 2015, and the return on invested capital for each sub-portfolio for the three month period ended December 31, 2015. Capital allocation is defined as the sum of the market value of securities held, less associated repurchase agreement borrowings, plus cash and cash equivalents and restricted cash associated with repurchase agreements. Capital allocated to non-portfolio assets is not included in the calculation.

The returns on invested capital in the PT MBS and structured MBS portfolios were approximately 3.8% and (1.7)%, respectively, for the fourth quarter of 2015. The combined portfolio generated a return on invested capital of approximately 1.7%.

(1) Effective duration of 2.326 indicates that an interest rate increase of 1.0% would be expected to cause a 2.326% decrease in the value of the MBS in the Company's investment portfolio at December 31, 2015. An effective duration of 2.663 indicates that an interest rate increase of 1.0% would be expected to cause a 2.663% decrease in the value of the MBS in the Company's investment portfolio at December 31, 2014. These figures include the structured securities in the portfolio but not the effect of the Company's funding cost hedges. Effective duration quotes for individual investments are obtained from The Yield Book, Inc.

Financing, Leverage and Liquidity

As of December 31, 2015, the Company had outstanding repurchase obligations of approximately \$77.2 million with a net weighted average borrowing rate of 0.61%. These agreements were collateralized by MBS with a fair value, including accrued interest, of approximately \$81.5 million. At December 31, 2015, the Company's liquidity was approximately \$9.1 million, consisting of unpledged MBS and cash and cash equivalents.

To enhance our liquidity further, we may pledge more of our structured MBS as part of a repurchase agreement funding, but retain cash in lieu of acquiring additional assets. In this way, we can, at a modest cost, retain higher levels of cash on hand and decrease the likelihood we will have to sell assets in a distressed market in order to raise cash. Below is a listing of outstanding borrowings under repurchase obligations at December 31, 2015.

Hedging

In connection with its interest rate risk management strategy, the Company economically hedges a portion of the cost of its repurchase agreement funding and also its junior subordinated notes by entering into derivative financial instrument contracts. The Company has not elected hedging treatment under U.S. generally accepted accounting principles ("GAAP") in order to align the accounting treatment of its derivative instruments with the treatment of its portfolio assets under the fair value option election. As such all gains or losses on these instruments are reflected in earnings for all periods presented. As of December 31, 2015, such instruments were comprised entirely of Eurodollar futures contracts.

The table below presents information related to outstanding Eurodollar futures positions at December 31, 2015.

Book Value Per Share

The Company's Book Value Per Share at December 31, 2015 was \$5.54. The Company computes Book Value Per Share by dividing total stockholders' equity by the total number of shares outstanding of the Company's Class A Common Stock. At December 31, 2015, the Company's stockholders' equity was \$68.5 million with 12,373,294 Class A Common shares outstanding.

Management Commentary

Commenting on the fourth quarter, Robert E. Cauley, Chairman and Chief Executive Officer, said, "The year and quarter ended December 31, 2015 represent the end of an era of sorts for Bimini Capital. Bimini was formed as an Agency REIT in late 2003 and operated as such since. In 2005 we acquired an Alt-A loan originator in an effort to expand our revenue stream. As most of you know, our timing was unfortunate, and we dealt with significant challenges in the mortgage and housing market. Substantial losses followed. Bimini has slowly and steadily recovered from that episode. We launched Orchid Island Capital in early 2013 and now derive substantial revenue from Orchid in the form of management fees, overhead sharing costs and dividends. These revenue streams — which for the most part flow to one of our taxable REIT subsidiaries, Bimini Advisors — have grown in relation to the traditional net interest income of Bimini's MBS portfolio. In fact, these revenue streams have grown to the point that, based on an independent valuation we had performed late last year, we no longer comply with one of the requirements for qualification as a REIT. For this reason Bimini will no longer be a REIT for Federal income tax purposes, or at least for the next four years. The flip side of this development is that Bimini can now operate outside of the income and asset tests necessary to maintain REIT status. We expect to do that in a way that will

allow us to take advantage of existing taxable NOLs. These NOLs exist at both Bimini and our former mortgage company, currently called MortCo TRS. Because Bimini is no longer a REIT, Bimini recorded a deferred tax asset associated with its NOLs. MortCo has always had a deferred tax asset, but has also recorded a valuation allowance against the asset, resulting in a net value of zero. The valuation allowance was recorded because MortCo no longer had any operations, and thus no ability to generate taxable income.

"We have analyzed and modeled potential outcomes with respect to our existing operations in an attempt to determine the best way to maximize our ability to harvest the taxable NOLs. Based on this analysis, we have begun to take the following steps. We will move the existing Agency MBS portfolio from Bimini to our former mortgage company, MortCo. This will allow the net interest income and resulting taxable income to be applied to MortCo's federal NOLs of approximately \$261.3 million. The external manager of Orchid, Bimini Advisors, was converted into an LLC for tax purposes. As a result, revenues and expenses of Bimini Advisors will be combined with the revenues and expenses of Bimini and, to the extent they result in net taxable income, be applied against Bimini's approximately \$21.3 million federal NOLs. In all cases, by using the NOLs to offset any tax liability we generate, we can deploy the net income into MortCo's portfolio. This in turn will allow us to grow it over time, slowly increasing its income generating potential and accelerating the consumption of the NOLs. The NOLs of Bimini and MortCo begin to expire in 2028 and 2025, respectively.

Based on our analysis, we believe that, more likely than not, Bimini will be able to generate sufficient taxable income to consume all of its NOLs prior to their expiration and therefore did not record a valuation allowance against its deferred tax asset. We performed similar analysis for MortCo and believe that, more likely than not, it will generate sufficient taxable income prior to the expiration of its NOLs to warrant removal of approximately 55% of the existing valuation allowance against its NOLs. In sum, Bimini recorded an income tax benefit for the year of approximately \$62.4 million, the result of establishing the Bimini deferred tax asset and the reduction of MortCo's valuation allowance. These figures are of course based on several assumptions, and therefore subject to revisions in the future if and when actual results differ from modeling forecasts. In particular, there is no assurance that Bimini and MortCo will generate taxable income. Given the magnitude of the income tax benefit, this dominated our results of operations for the year and drove the significant increase in our book value.

"Going forward, we anticipate we will continue to operate an Agency MBS portfolio, now at MortCo, although with slightly more latitude to hedge and manage our risk now that we are no longer subject to the REIT rules. We anticipate the portfolio will continue to be all Agency MBS, although we will be able to better utilize the securities within this universe. The process of migrating the MBS portfolio from Bimini to MortCo has already begun. The second segment of our operations will be the management of Orchid and its MBS portfolio. Bimini itself will generally become a holding company once its MBS portfolio is migrated to MortCo, with two 100% owned subsidiaries conducting their respective operations that we expect will benefit from the NOLs."
